

FIRE ISOLATOR

Datasheet Fire Blanket Ultra FI-ULTRA0806

Product description

The Fire Blanket ULTRA is the perfect tool for isolating and controlling ICE & EV car fires. Especially designed for use in tight spaces like indoor parking lots, shopping malls, ferries, etc. The blanket can be used for all car sizes, including large SUVs.

Its unique fabric composition incorporates flame and radiant heat while allowing gases, smoke, and vapor to escape safely. This is crucial for preventing hazardous gas buildup under the blanket and enhances safe access for firefighters.

The ULTRA blanket is designed for multiple deployments and can be cleaned. It can withstand peak temperatures of 2050°C, and has a continuous working temperature of 1400 °C.

Dimensions & Specifications

Art. no: FI-BLULTRA0806
Dimensions: 8 x 6 m*
Weight: 34 kg
Material: 96,6% Highest quality Silica, graphite coating
Temperature resistance: + 2050 °C Peak
Classification: DIN EN 13501-1 classified with A1 certificate by KIWA/ MPA, ASTM D6413 classified by HPL Engineering NFPA701 by SGS, DIN SPEC 91489
HS code: 70199000
Usage: reusable

Also available in custom-made sizes.

Pictures

- Supplied in sturdy smartbag
- Cabinet available
- Big coloured loops for easy handling of the blanket
- Suitable from small cars to large Pickups
- No expiration date, shelflife of 25 year+ if properly stored
- The Fire Isolator ULTRA blanket is designed for multiple deployments. Its lifespan depends on adhering to the official deployment protocol and passing a thorough-post-incident inspection to ensure the fabric's integrity remains intact.

* The blanket has a tolerance of +/- 5% in width and length, which can be affected by temperature and moisture.
